

Oxygen Bottle Carrier

The Oxygen Bottle Carrier is designed to fit under the seat of any 'A' frame wheeled walker and will fit an oxygen cylinder up to 125 mm in diameter.

The holder is suspended by hooks that attach to the front and back cross piece of the walker and is set at an angle for optimal oxygen supply and to prevent the oxygen bottle from tipping out. It sits neatly underneath the seat of the walker.

Suitable for all BetterLiving wheeled walker models excluding the Tri-Wheel and Shopper.
