

## Maxi Plus Wheeled Walker

Soft touch braking mechanism

Height adjustable handles (790-920 mm)

Extra wide steel frame with tube-in-tube construction for increased strength

Compact fold down design

203 mm (8 inch) castors

Durable moulded orthopedic handgrip

Foam backrest

Moulded seamless seat with concealed PVC seat pouch

Removable basket and bag

Ideal for people weighing more than 160 kg

With maximum overall width and weight tested to 220 kilograms, the Maxi Plus Wheeled Walker is the ideal choice for users of 160 kilograms or more. The sturdy steel frame with tube-in-tube construction increases product strength and durability.

Recommended for general indoor and outdoor use, eight inch castors provide increased mobility on uneven, outdoor or rough terrain surfaces.

The durable moulded handgrips with soft touch brakes are ideal for people with limited strength or mobility; maximising user comfort by minimising pressure on the hand. Handle height can be adjusted easily to best suit the user, with an extension range of 130 mm to suit users of very large or heavy stature.

With maximised width to accommodate the larger user, the moulded PVC seat is completely seamless, reducing the potential

# Maxi Plus Wheeled Walker

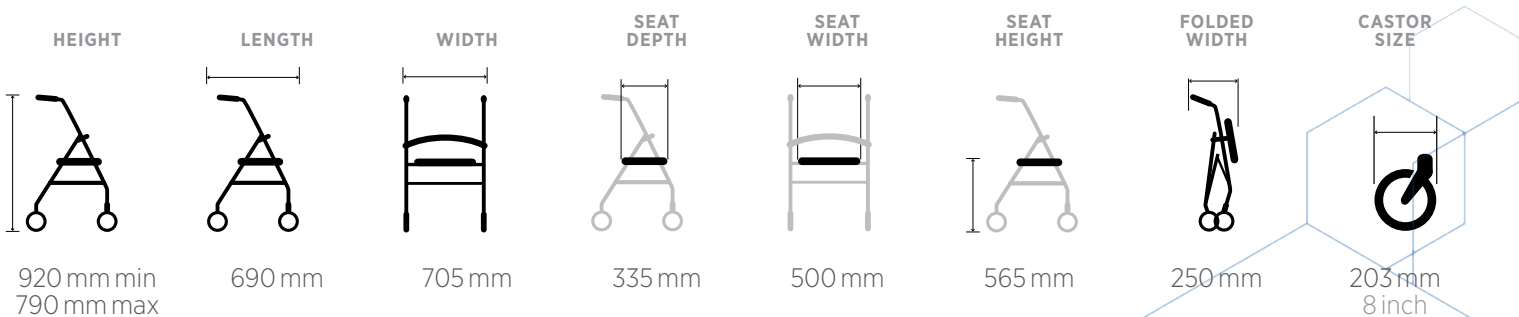

for skin tear or abrasion, plus foam backrest for added comfort when seated.

Cleverly concealed beneath the seat is a PVC pouch, offering additional security for small personal valuables.

With the added convenience of both basket and bag that can be used together (basket fits inside the bag to conceal contents) or individually. Both items are removable, for the security and transport of goods when leaving the wheeled walker unattended.

Easy closing mechanism and compact fold down design for convenient transport or storage.
